

Delivering Actionable Insights for Better Informed Decisions

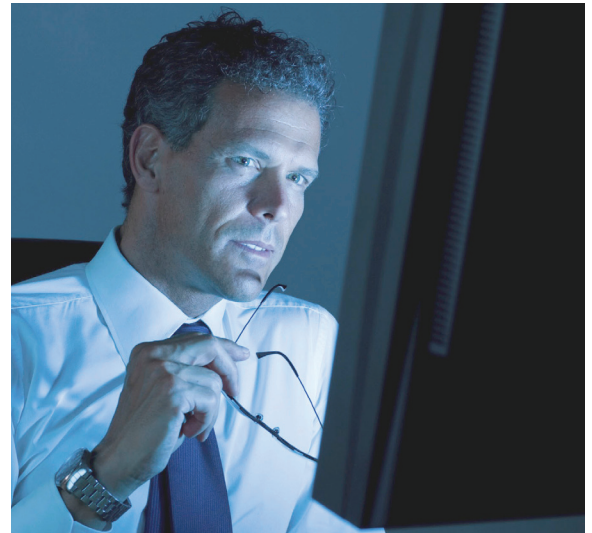

Eastport Analytics enables you to repeatedly discern the vital insights you need to make sound corporate decisions.

Our experts combine unique analytic methodologies with the right tools to deliver a broader perspective, deeper understanding and better reasoning over evidence. You stay focused on your challenge; we bring advanced techniques and a broad knowledge of software products to the table.

The result is actionable insight, better-informed decisions and practical, repeatable, defensible answers to real-mission problems.

We help you:

- **Assimilate:** find, gather, validate, and select the most useful facts from large volumes of multisource data.
- **Understand:** discern significant interconnections, patterns and trends; formulate and test hypotheses; recognize important events; and uncover meaningful insights.
- **Decide:** organize, communicate and defend the findings that impact your organization's decision-making process.

State-of-the-Art Tools and Techniques

We aggressively track over 500 best-in-class commercial and open source software tools. Using our Tools Harness, we can mix and match these resources to give you critical analytic capabilities over your data – in your environment.

The mission-centered professionals that make up our solution teams thrive on the analytical challenges our clients face daily. Eastport Analytics engineers and analysts average five to ten years of experience and many hold high-level U.S. Government security clearances.

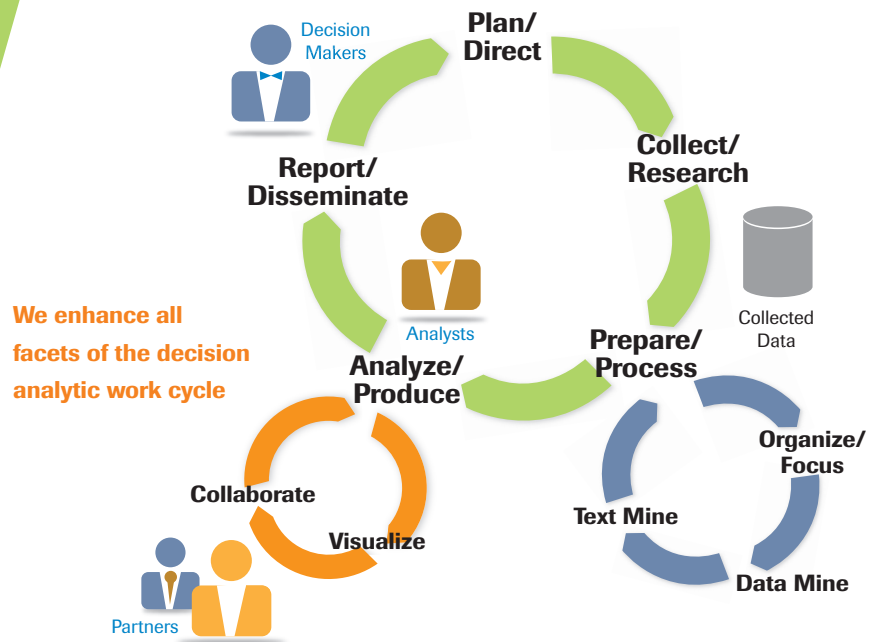

“You’ll walk out of Eastport’s Lab with insights you never had before.”

**-Competitive Intelligence Professional,
National Non-Profit Membership
Organization**

“Eastport has command of a range of analytics that most other analyst firms don’t have.”
- Executive Director and Chief Intelligence Officer

“You don’t just have access to the tools, the Eastport folks have expertise in the tools and deliver the insight we need.”

- Senior Manager in the Department of Homeland Security

Developing Better Insight in Less Time

We work quickly and collaboratively with you to start showing results early in the engagement. Our unique methodology allows us to combine effective analytic process with tools that augment your established capabilities, enabling all aspects of the analytic work cycle.

Together with you, we create a roadmap of short-cycle, incremental development, blending scheduled capability introductions with plenty of opportunity for direct, customer-driven feedback. This allows us to rapidly deliver and continuously improve working solutions. The result? Better insight in less time.

Our History is Solutions

Since 1999, we have been delivering award-winning solutions focused exclusively on helping analysts and decision-makers produce better insights from more data in less time.

Eastport’s broad range of solution expertise includes:

- **Fraud Detection and Risk Analysis:** helping intelligence, counterintelligence, counter-terrorism, law enforcement, other government agencies and commercial organizations to detect, understand and thwart the activities of wrongdoers.

- **Situation Assessment and Early Warning:** improving systematic assessment and monitoring of emerging situations, vulnerabilities and opportunities; exploring and evaluating alternative scenarios; and defending conclusions.
- **Visualization in Large Data Sets:** enhancing the capabilities of government and commercial information centers to aggregate multi-source data and to discover non-obvious patterns.
- **Strategic Roadmapping:** identifying needed analytical improvements and defining technology investments that will help to achieve them.

“They understand and augment what we already have so that we can do the analysis more efficiently rather than hunt for the nuggets of information.”

- Office Director at the Internal Revenue Service
