

Access to the Realm of the Possible

“The Eastport Lab is mind-blowing – an unparalleled experience. I walked away with insights I’ve never had before.”

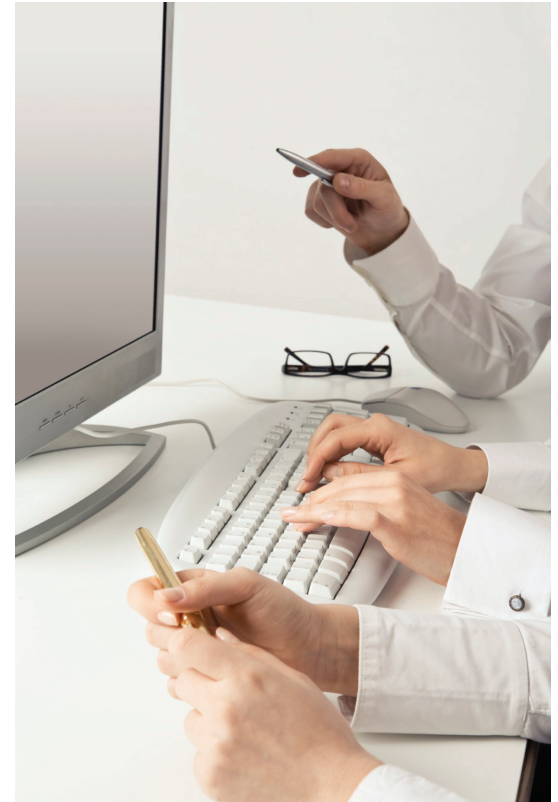

Analysts and decision-makers face a bewildering array of technology designed to gather, assimilate and analyze vast amounts of data. It is too easy to become mired in deciding which tools to use instead of focusing on the mission itself – gaining actionable insight for critical decisions. Eastport Labs is the solution.

Eastport Labs is a comfortable “collaboratory” built specifically for exploring the realm of the possible in technology support to analysis. More than just a lab, it is the physical manifestation of Eastport Analytics’ knowledge in decision analytics. It encompasses our expertise in specific techniques and methodologies and an understanding of how to apply and combine the wide range of available products.

Within Eastport Labs, we work with clients to help develop a broader perspective on every mission-critical challenge.

Uniting the Technical with the Possible

Inside Eastport Labs, we collaborate with our clients to pair innovative decision analytics procedures and methodologies with the right enabling technologies. We

maintain an interactive knowledge base of more than 500 off-the-shelf and open source products and technologies relevant to decision analytics.

Within the Lab, we keep up with emerging technologies while also tracking which tools are interchangeable with other comparable off-the-shelf offerings. We always have the most progressive and forward-thinking solutions at our fingertips so your time is spent collaborating with our expert engineers to deliver solutions – instead of worrying about which technology to use.

“Eastport Analytics quickly understands the problem, and that carries through from one project to the next.”

“Eastport Analytics helps you get to the ‘so what’ quickly.”

“Eastport Analytics saved us time, a lot of money, effort, frustration and gave us new ideas.”

Innovation That Leverages Enabling Technologies

Eastport Labs creates an ideal environment for innovation. Our proficiency in decision analytic methods and technologies enables us to envision and craft solutions that generate actionable insights with an immediate impact.

The exploratory nature of the Lab supports our rapid-prototyping process, which offers tremendous benefits – including giving our clients the ability to visualize and manipulate their own data. This collaborative approach identifies the right technologies to suit each client’s needs.

About Eastport

Eastport Analytics helps transform information into vital insights you can use to make sound corporate decisions. We blend sophisticated technology with agile integration practices to rapidly develop innovative decision support solutions. We enable actionable insight, better-informed decisions and practical, repeatable, defensible answers to real-mission problems.
